PROFILE:

Mechanical Engineer with experience in mechanical design, project execution, and maintenance engineering. Skilled in CAD modeling, fabrication documentation, and resolving on-site engineering challenges. Experienced in supervising teams and improving workflow systems.

PERSONAL DATA:

Citizenship: Filipino
Sex: Male
Marital Status: Single
Age: 26 years old
Date of Birth: December 06, 1999
Place of Birth: Pasig City
Address: B7 L1 Dresden St. Mercedes Exec. Villa. San Andres Cainta, Rizal, Philippines

WORK EXPERIENCE:

Mechanical Project Engineer (Full-Time)
Ramcar Group of Companies – Bulacan, Philippines
(October 2023 – Present)

Led planning, execution, and monitoring of store maintenance and new construction projects for multiple retail brands.

Key Responsibilities & Achievements:

- Managed end-to-end execution of new store construction and maintenance projects.
- Developed Excel-based monitoring systems and dashboards for work tracking and management reporting.
- Supervised and trained manpower teams assigned to:
    - New store construction project
    - Trailer maintenance
    - Store maintenance operations
    - New Trailer Shop Project

- Resolved on-site engineering and design issues and implemented preventive measures.
- Coordinated with contractors, suppliers, and internal departments to ensure timely completion.
- Ensured compliance with engineering standards and safety regulations.
- Improved workflow efficiency through structured reporting and monitoring tools.

WORK IMMERSION EXPERIENCE:

Mechanical Design Engineer (On-the-job Training)
Ramcar Technology Inc.
(May 8 to September 30, 2021 - 600hrs)

Supported mechanical design and production operations through CAD drafting, fabrication documentation, and plant workflow coordination.

Key Responsibilities & Achievements:

- Submitted a 3D CAD design and drafting using 2D and 3D CAD software
- Prepared technical drawings and fabrication layouts for production
- Supported machining operations including measurement, material preparation, and quality checking
- Coordinated with machine operators and senior engineers to ensure design accuracy and manufacturability
- Assisted in concept evaluation, mechanical feasibility review, and design considerations
- Assisted in trade-off analysis on equipment modifications to balance performance, cost, and maintenance requirements
- Supported the design-to-production workflow:
    - Concept design → internal approval → customer presentation → design review → 3D detailing → design review with production/project owners → execution.
    - Ensured proper documentation using TES forms, Job Request Forms (JRF), Work Breakdown Structures (WBS), and DRCC job packets.

- Gained hands-on experience in plant operations including: machining, sheet metal fabrication, welding, assembly, foaming/refrigeration systems, finishing, and inventory management

- Applied problem-solving in mechanical design, machining feasibility, and workflow optimization

EDUCATION:

Polytechnic University of the Philippines – Manila (2018-2022) Bachelor of Science in Mechanical Engineering

- DOST-SEI RA7687 Scholar
- Achieved various awards from participating quiz bees
- ME Quizzer member

Rizal High School (2012-2018) Science, Technology, Engineering and Mathematics Strand

- 4-time School Math Quiz Bee Champion
- School representative for various math quiz bees
- Graduated with Honors

TECHNICAL SKILLS:

- SolidWorks (Parts, Assemblies & Technical Drawings)
- Autodesk Inventor Professional (Parts, Assemblies & Technical Drawings)
- Autodesk AutoCAD (2D Drafting & 3D Modeling)
- Bill of Materials (BOM) preparation & material specification
- Microsoft Office Suite (Word, Excel, PowerPoint, Teams)
- Equipment evaluation & machine benchmarking
- Engineering trade-off evaluation (performance vs footprint)
- Technical Drawing Interpretation & Shop Layout Planning
- Basic MEP & site coordination
- Project documentation & progress tracking

CORE STRENGTHS:

- Strong analytical and problem-solving ability
- Detail-oriented engineering documentation & planning
- Leadership & manpower coordination
- Safety compliance and risk awareness
- Ability to work under pressure and meet deadlines
- Adaptable in fast-paced project environments
- Clear technical communication & reporting

SEMINARS/TRAININGS ATTENDED

- Scientific Research Seminar: Capstone Project (August 17, 2017)
- International Metal Working Philippines Exposition (2018)
- DOST National Science and Technology Week (2018 & 2019)
- Auto CADD 3D Tutorial (2019)
- PSME National Student's Conference (October 16, 2019)
- JPSME Cavite Chapter's 1st Virtual Conference (2021)
- SMAW, TIG, and MIG Welding Hands-On Training (2021)
- Conventional Machining (Lathe, Drilling, Milling) Hands-On Training (2021)
- CNC Machine Operations (Waterjet, CNC Lathe, Drilling, Milling) Hands-On Training (2021)
- Workshop on Tolerances and GD&T Standards (2021)
- Sheet Metal & Machine Shop Fabrication Techniques Seminar (2021)
- 3rd Technical Conference: Student PSME (2022)
- SMC Basic Pneumatics Training (2023)

ACHIEVEMENTS AND RECOGNITIONS:

- ME quizzer member at department of Mechanical engineering (2018-2022)
- College of Engineering and Architecture (CEA) Dean's Lister (2018-2019)
- Top 10 Mechanical Engineer's Licensure Exam (February 26-27, 2023)
